

No Skidding® DIY Anti Slip Tile, Bathtub & Shower Treatment

An easy-to-use, economical and proven anti slip treatment that addresses the problem caused by slippery-when-wet tile floors and enamel or porcelain bathtubs. No Skidding® DIY Anti Slip Treatment creates an "Invisible Tread" on tile floors and enamel or porcelain bathtubs that significantly increases the coefficient of friction.

- The Treatment works on natural unsealed mineral floors, such as ceramic, porcelain, quarry tile, granite, mosaic tile, slate, terrazzo, etc.
- Typically lasts for years with one application.
- It may be used indoors and outdoors.
- The wetter the floor the more effective the slip-resistance.
- Ready to use. Quick and easy to apply. Supplied with detailed instructions for use. Simply use 4 ounces per tub or shower. The process takes less than five minutes from start to finish for tubs or showers.
- Packaged in 4 oz. & 8 oz. bottles for tubs or showers. One quart (946 ml) will slip treat approximately 100 sq. ft. (10 square meters) of tile or 8 enamel or porcelain bathtubs, or a combination of both.
- Very cost effective, only pennies per square foot.
- Exceeds coefficient of friction requirements for ASTM, OSHA, ADA, Canadian and U.S. Government industrial safety standards.

Say goodbye to slippery...

with No Skidding® DIY Anti Slip
Tile & Bath Tub Treatment
10900 Series

No Skidding®

FLOOR SAFETY & MAINTENANCE PRODUCTS

FIRST IN ANTI SLIP PRODUCTS SINCE 1993

Say **goodbye** to slippery...

Helps prevent slip and fall accidents on:

- Enamel and porcelain bathtubs and bathroom floors
- Ceramic tile shower floors
- Ceramic, porcelain, granite and most hard floor tiles
- Tile areas surrounding whirlpools, hot tubs and swimming pools
- Effective on most hard mineral surfaces
- Turns slippery when wet in to slip resistant when wet
- Economical and easy

Used by major hotels, senior care, restaurants, governments, industry and commerce on six continents since 1993.

No Skidding® Treatment is a water based, low odor, colorless liquid. It is not a coating.

No Skidding® Treatment is simply applied to the base of the tub or tile. The surface is kept wet with the Treatment, then rinsed away with clean, cold water. This simple process increases the coefficient of friction and is typically effective for up to 5 years with the one application. The surface can be put back into use immediately. There is no cure time as with coatings.

How does No Skidding® Treatment work?

All natural stone tiles including ceramic and porcelain tubs contain small amounts of silica. No Skidding® Anti Slip Treatment is carefully formulated to dissolve a controlled amount of the silica so as to create thousands of minute, shallow indentations in the surface.

This profile is so subtle that it cannot be seen or felt. Because the profile sits **BELOW** the level of the surface, it does not affect the cleaning process as with a profile that stands **ABOVE** the surface such as an anti slip paint coating.

When the surface is wet with water, these shallow indentations fill. When one stands on the wet surface and ones foot starts to slide, the water is squeezed out of the indentations turning them into thousands of suction cups that helps stop the foot from slipping.

All that is required is good housekeeping to keep the surface free of soil accumulation and soaps on a regular basis.

Sizes

#10904	4 oz. (118 ml)	treats 1 tub	24/carton
#10908	8 oz. (237 ml)	treats 2 tubs	12/carton
#10932	32 oz. (946 ml)	treats 8 tubs or 100 ft. ² of tile	12/carton

For larger projects please inquire about our gallon (3.78 L) and 5 gallon (18.9 L) containers.

Note: This product is not suitable for acrylic tubs or painted bathtubs. For these surfaces please inquire about No Skidding® Anti Slip Bathmats, Shower Mats or Anti Slip Aerosol.
