**The Problem:**

- Slips and falls are the second leading causes of accidental death and third leading cause of disability - CDC
- Slips and falls are the leading cause of workers’ compensation claims - NFSI
- Slips and falls are the greatest source of general liability claims within the construction industry in the USA - National Restaurant Association
- Slips and falls are the most common workplace hazards and make up over a third of all major injuries - MSE, USA
- In the USA alone 85% of workers’ compensation claims are attributed to employees slipping on slippery floors - Industrial Safety & Occupational Health Marketer, 5th edition
- Compensation and medical costs associated with employee slip related accidents is approximately $92 billion annually in the USA - National Safety Council
- Slips and falls in public places are the leading cause of premises liability injuries.
- Over eight million people treated for slip and fall related injuries per year in the USA alone - NRCPC, CDC, CPSC, point study.

**The Solution:**

No Skidding® FRP Step Covers and FRP Landing Covers. These sheets can be butted together to produce slip-resistant walkways and work areas.

No Skidding® Anti-Slip FRP Treads and FRP Landing Covers are a quick and simple solution for greasy, slippery floors and stairs which cannot be painted or coated due to weather, lack of downtime or are chemically damaged. Anti-Slip FRP Treads and FRP Landing Covers are suitable for interior and exterior concrete, wood, stone, metal or brick. They are used on stairs, walkways, ramps, vehicles, decks and landings to rapidly remedy slippery areas with minimal downtime. Unlike Anti-Slip Coatings or Anti-Slip Stair Tapes, No Skidding® FRP Treads and Panels can be installed within minutes. The application in very cold or wet areas where the application of a coating may be impractical.

No Skidding® Anti-Slip FRP Treads and FRP Landing Covers are a quick and simple solution for greasy, slippery floors and stairs which cannot be painted or coated due to weather, lack of downtime or are chemically damaged. Anti-Slip FRP Treads and FRP Landing Covers have a heavy duty resin bonded anti-slip surface that matches FRP Step Covers and FRP Landing Covers. These sheets can be butted together to produce slip-resistant walkways and work areas.

No Skidding® is a registered trademark of No Skidding Products, Inc., Toronto, Canada.

In addition to our No Skidding® FRP Panels, Treads and Step Covers for instant anti-slip protection, we also supply a comprehensive range of Anti-Slip Coatings, Anti-Slip Tapes, Anti-Slip Floor Coats, Anti-Slip Strips and Tapes, Reflective and Photoluminescent Tapes.

**Typical Surfaces:**

- Stone, grating and metal.
- Residential
- Farming
- Mining
- Retail & restaurants
- Schools & universities
- Refineries
- Hospitals & senior care
- Military
- Shipping & transportation
- Outdoor stairs and ramps
- Steps & stairs
- Decking
- Fire escape landings and stairs
- Around machinery
- Manufacturing & warehousing
- Restaurants & hotels
- Cafeterias & warehouses
- Retail & restaurants
- Manufacturing & warehousing
- Churches & temples
- Schools & universities
- Hotels & restaurants

**Typical Industries and Environments:**

- Transportation & vehicles
- Decks and landings to rapidly remedy slippery areas with minimal downtime.
- Steps & stairs
- Fire escape landings and stairs
- Around machinery
- Manufacturing & warehousing
- Restaurants & hotels
- Cafeterias & warehouses

**Application:**

No Skidding® Anti-Slip Fiberglass (FRP) Solutions

Provide immediate anti-slip safety with almost indestructible Anti-Slip FRP Treads on Panels. No Skidding® FRP Treads and Panels are suitable for interior and exterior concrete, wood, stone, metal or brick. They are used on stairs, walkways, ramps, vehicles, decks and landings to rapidly remedy slippery areas with minimal downtime. Unlike Anti-Slip Coatings or Anti-Slip Stair Tapes, No Skidding® FRP Treads and Panels can be installed within minutes. The application in very cold or wet areas where the application of a coating may be impractical.

**Before**

**After**

No Skidding® FRP Treads and Panels are a quick and simple solution for greasy, slippery floors and stairs which cannot be painted or coated due to weather, lack of downtime or are chemically damaged. Anti-Slip FRP Treads and Panels have a heavy duty resin bonded anti-slip surface that matches FRP Step Covers and FRP Landing Covers. These sheets can be butted together to produce slip-resistant walkways and work areas.
Features and Benefits of No Skidding® Anti-Slip FRP Solutions:

- Durable FRP base that resists warping, stretching and swelling.
- Resistant to salt and salt water.
- Superior gritted anti-slip surface available in coarse, medium and fine textures.
- Quick and easy installation in all weather conditions.
- Can be walked on immediately with minimal lost time and work stoppages.
- Suitable for concrete, wood, brick, stone and metal interior and exterior applications.
- Easy to install - can be screwed into place or glued into place with a urethane / polyurethane adhesive.
- Can be installed onto grating using our grating clip kit.
- Can be installed even in winter months using screws.
- Available in easy to install treads and panels.
- Available in black or yellow and also black with yellow safety stripe for our flat plates and step covers.
- Available in easy to install treads and panels.
- Suitable for concrete, wood, brick, stone and metal interior and exterior applications.
- Superior gritted anti-slip surface available in coarse, medium and fine textures.
- Durable FRP base that resists warping, stretching and swelling.

Maintenance:

Our FRP Panels and Step Covers can be swept to loosen and remove dirt. Step covers and walkways can be cleaned using a general purpose industrial floor cleaner. For embedded dirt, use a stiff bristled brush with an industrial abrasive applied over thermoset polyester fiber reinforced polymer panels.

No Skidding® Step Covers and Treads are designed to be applied over existing stairs thereby quickly creating a safe, slip-resistant surface that provides traction and safety.

- Panels are 1/8” thick prior to grit-coating
- Available with three grit options: Coarse/Heavy Duty, Medium and Fine

Single Color Treads - YELLOW or BLACK only

No Skidding® Flat Plates

- Designed to be applied over existing stairs thereby quickly creating a safe, slip-resistant surface that provides traction and safety.

FRP Plate Anti-Slip Products:

- Reduces slips on steps, railway ties, walkways, wooden decks, marine applications, bridges, etc.
- Used in both indoor and outdoor applications.
- Suitable for concrete, wood, brick, stone and metal.
- Can be fixed permanently with screws or adhesive.
- Suitable for outdoor environments where anti-slip tapes can’t be applied because of winter weather constraints.
- An even more cost effective option to our Step Covers when a nose is not required.

No Skidding® Walkway and Ramp Panels

No Skidding® Anti-Slip FRP Panels are heavy duty solutions providing immediate and durable anti-slip protection for exterior and interior areas over wood, concrete, brick, stone and metal. They provide a quick fix for slippery surfaces that can’t be easily resurfaced. Our panels can be butted together to create slip-resistant walkways, landings, ramps or working areas rapidly with virtually no downtime or inconvenience. They are easily installed and allow to floors or ramps using adhesive or screws.
The Problem:
- Slip and falls are the second leading cause of accidental death and third leading cause of disability - CDC
- Slip and falls are the leading cause of workers’ compensation claims - NFNI
- Slip and falls are the greatest source of general liability claims within the restaurant industry in the USA - National Restaurant Association
- Slips and falls are the most common workplace hazards and make up over a third of all major injuries - HS2 USA
- In the USA alone 85% of workers’ compensation claims are attributed to employees slipping or tripping - Industrial Safety & Occupational Health Markets 5th edition
- Compensation and medical costs associated with employees slipping and falling is inarguably 910 billion annually in the USA - National Safety Council
- Slip and falls and public places are the leading cause of permanent disability injuries.
- It is estimated over 10 million people in the US are treated for slip and fall injuries each year. - HS2 USA
- Over eight million people treated for slip and fall-related injuries (per year) in the USA - National Restaurant Association

The Solution:
No Skidding® high traction, slip-resistant coatings, treatments, floor care, sealers, treads, and FRP step covers, panels and rolls are proven, precise, and cost effective ways to reduce slip and falls and help to ensure a safer environment for workers and visitors. No Skidding® FRP step covers, panels and plates are a quick and easy solution for making walkways, ramps and stairs anti-slip when weather conditions won’t accommodate an anti-slip coating or anti-slip tape or limited downtown won’t accommodate an anti-slip coating.

Let us help you create a safer environment today.

Typical Applications:
- Ramps
- Dock & stairs
- Fire escape landings and stairs
- Dock & steps
- General machinery
- Floor protection
- Shipping & transportation

Typical Industries and Environments:
- Shipping & Transportation
- Mining
- Medical & healthcare environments
- Egress & Anti-Slip Glow-in-the-Dark Tapes
- Safety Tapes
- Anti-Slip Fiberglass (FRP) Solutions
- Anti-Slip Conformable Tapes
- Anti Slip Grit Tapes - Colors
- Anti Slip Vinyl & Resilient Tapes
- Vinyl Aisle Marking Tapes
- Reflective Tapes
- Anti Slip Floor Care
- Anti Slip Coatings
- No Skidding® Anti-Slip FRP Strips, Stair Covers and Panels are a quick and simple solution for greasy, slippery floors and stairs which cannot be painted or coated due to weather, lack of downtime or are chemically damaged. Anti-Slip FRP Treads and Panels can be installed in minutes to create a slip resistant area with minimal downtime. Unlike Anti-Slip Coatings or Anti-Slip Tapes, No Skidding® FRP Treads and Panels can be installed in minutes to create a slip resistant area with minimal downtime.

No Skidding® manufactures and supplies a wide selection of sizes, colors and textures. Our standard rolls and precut treads available in a variety of grit sizes and colors for outdoor applications.

In addition to our No Skidding® FRP Treads, Panels and Step Covers for instant anti-slip protection, we are not responsible for results obtained in using these products, even when used as suggested. The user should conduct tests to determine the suitability of the product for the intended use under conditions of use and expected performance. Many factors beyond our control and uniquely within user’s knowledge and control can affect the performance and useful life of No Skidding® products, including the type and preparation of the surface to be treated. We warehouse within the USA for our US customers. Made in North America.

No Skidding® Anti-Slip Fiberglass (FRP) Solutions
- No Skidding® instant anti-slip solutions for stairs, ramps, floors, decks, and vehicles.
- Provide immediate anti-slip safety with almost indestructible Anti-Slip FRP Treads on Panels.
- No Skidding® FRP Treads and Panels are suitable for interior and exterior concrete, wood, stone, metal or brick. They are used on stairs, walkways, ramps, vehicles, decks and landings to rapidly remedy situations.
- No Skidding® FRP Treads and Panels can be installed in minutes to create a slip resistant area with minimal downtime. Unlike Anti-Slip Coatings or Anti-Slip Tapes, No Skidding® FRP Treads and Panels can be installed in minutes to create a slip resistant area with minimal downtime.

No Skidding® FRP Treads and Panels are a quick and simple solution for greasy, slippery floors and stairs which cannot be painted or coated due to weather, lack of downtime or are chemically damaged. Anti-Slip FRP Treads and Panels have a heavy duty resin bonded anti-slip surface that matches FRP Step Covers and FRP Leading Covers. These sheets can be butted together to produce slip-resistant walkways and work areas.
Features and Benefits of No Skidding® Anti-Slip FRP Solutions:

- **Lightweight and ideal for use on structurally sound flooring and steps.**
- **Our anti-slip step covers, plates, treads and walkway panels provide slip-resistance and durability on surfaces such as inclines, ramps, and stairs.**
- **Can be installed even in winter months using screws.**
- **Available in black or yellow and also black with yellow safety stripe for our flat plates and step covers.**
- **Available in easy to install treads and panels.**
- **Can be installed onto grating using our grating clip kit.**
- **Easy to install - can be screwed into place or glued into place with a urethane / polyurethane adhesive.**
- **Suitable for concrete, wood, brick, stone and metal interior and exterior applications.**
- **Can be walked on immediately with minimal lost time and work stoppages.**
- **Quick and easy installation in all weather conditions.**
- **Superior gritted anti-slip surface available in coarse, medium, and fine textures.**
- **Resistant to salt and salt water.**
- **Keeping the steps clean. Our FRP Step Covers and Panels can be pressure sprayed up to 1000 psi.**
- **Using a general purpose industrial floor cleaner. For embedded dirt, use a stiff bristled brush with an industrial abrasive applied over thermoset polyester fiber reinforced polymer panels.**

No Skidding® FRP Step Covers are durable anti-slip fiberglass treads and nosings designed for stairs. They are used for both interior and exterior applications and are suitable for concrete, wood, stone, brick or metal stairs. No Skidding® FRP Step Covers are lightweight, versatile, easy to install, available black, yellow or black with yellow safety stripe for our flat plates and step covers. Our anti-slip step covers, plates, treads and walkway panels provide slip-resistance and durability on surfaces such as inclines, ramps, and stairs.

No Skidding® Step Covers and Treads are designed to be applied over existing stairs thereby quickly creating a safe, slip-resistant surface that provides traction and safety. Panels are 3/8" thick with grit-coating. Available with three grit options: Coarse, Medium and Fine.

No Skidding® FRP Flat Plate Anti-Slip Products:

- **Reduces slips on steps, railway ties, walkways, wooden decks, marine applications, bridges, etc.**
- **Used in both indoor and outdoor applications.**
- **Suitable for concrete, wood, brick, stone and metal.**
- **Available in a variety of sizes.**
- **Can be fixed permanently with screws or adhesive.**
- **Suitable for outdoor environments where anti-slip tapes can’t be applied because of winter weather constraints.**
- **An even more cost effective option to our Step Covers when a nose is not required.**

No Skidding® Anti-Slip FRP Plates are constructed from a durable FRP base which is resistant to buckling, rotting and extreme weather. Available in three grit textures for excellent anti-slip properties. Ideal for indoor and outdoor applications.

No Skidding® Walkway and Ramp Panels

No Skidding® Walkway and Ramp Panels are heavy duty solutions providing immediate and durable anti-slip protection for exterior and interior areas over wood, concrete, brick, stone and metal. They provide a quick fix for slippery surfaces that can’t be easily resurfaced. Our panels can be butted together to create slip-resistant walkways, landings, ramps or working areas rapidly with virtually no downtime or inconvenience. They are easily installed and affixed to floors or ramps using adhesive or screws.

No Skidding® Flat Plates

No Skidding® Flat Plates are constructed from a durable FRP base which is resistant to buckling, rotting and extreme weather. Available in three grit textures for excellent anti-slip properties. Ideal for indoor and outdoor applications.

**Features and Benefits of No Skidding® FRP Plate Anti-Slip Products:**

- Reduces slips on steps, railway ties, walkways, wooden decks, marine applications, bridges, etc.
- Used in both indoor and outdoor applications.
- Suitable for concrete, wood, brick, stone and metal.
- Available in a variety of sizes.
- Can be fixed permanently with screws or adhesive.
- Suitable for outdoor environments where anti-slip tapes can’t be applied because of winter weather constraints.
- An even more cost effective option to our Step Covers when a nose is not required.
Features and Benefits of No Skidding® Anti-Slip FRP Solutions:

• Durable FRP base that resists warping, stretching and swelling.
• Resistant to salt and salt water.
• Superior gritted anti-slip surface available in coarse, medium and fine textures.
• Quick and easy installation in all weather conditions.
• Can be walked on immediately with minimal lost time and work stoppages.
• Suitable for concrete, wood, brick, stone and metal interior and exterior applications.
• Easy to install - can be screwed into place or glued into place with a urethane / polyurethane adhesive.
• Can be installed even in winter months using screws.
• Available in easy to install treads and panels.
• Available in black or yellow and also black with yellow safety stripe for our flat plates and step covers.
• Our anti-slip step covers, plates, treads and walkway panels provide slip-resistance and durability on surfaces such as inclines, ramps, and stairs.
• Lightweight and ideal for use on structurally sound flooring and steps.

Maintenance

Our FRP Panels and Step Covers can be swept to loosen and remove dirt. Step covers and walkways can be cleaned using a general purpose industrial floor cleaner. For embedded dirt, use a stiff bristled brush with an industrial cleaner. Our FRP Step Covers and Panels can be pressure sprayed up to 1000 psi.

No Skidding® Step Covers and Treads

No Skidding® FRP Step Covers are durable anti-slip fiberglass treads and nosings designed for stairs. They are used for both interior and exterior applications and are suitable for concrete, wood, stone, metal or grated steps.

No Skidding® FRP Step Covers are lightweight, versatile, easy to install, black or yellow with black with yellow nosing for easy identification. Our No Skidding® FRP Treads are constructed with our proprietary blend of mineral abrasives applied over thermoset polyester fiber reinforced polymer panels.

Many slips on stairs happen at the edge of a step when the surface wears and the edge becomes rounded. Wear, water, dust, dirt, ice, or oil on the stairs heightens the problem creating a potentially dangerous situation.

No Skidding® Step Covers and Treads are designed to be applied over existing stairs thereby quickly creating a safe, slip-resistant surface that provides traction and safety.

• Panels are 1/2" thick prior to grit-coating
• Available with three grit options: Coarse, Medium and Fine

No Skidding® Anti-Slip FRP Plates are constructed from a durable FRP base which is resistant to buckling, rotting and extreme weather. Available in three grit textures for excellent anti-slip properties. Ideal for indoor and outdoor applications.

No Skidding® Flat Plates

• An even more cost effective option to our Step Covers when a nosing is not required.
• Suitable for concrete, wood, brick, stone and metal.
• Available in a variety of sizes.
• Can be fixed permanently with screws or adhesive.
• Suitable for outdoor environments where anti-slip tapes can't be applied because of winter weather constraints.
• An even more cost effective option to our Step Covers when a nose is not required.

No Skidding® FRP Plate Anti-Slip Products:

• Reduces slips on steps, railway ties, walkways, wooden decks, marine applications, bridges, etc.
• Used in both indoor and outdoor applications.
